The Executive and Risk

When dealing with risk, nothing is more unwelcome than a costly financial surprise. Executives need to cut through the mountains of organizational data for real visibility into the potential risks and rewards the organization faces. You need to make confident decisions that enable you to hit your financial targets and increase shareholder value.

DO YOU HAVE THE VISIBILITY YOU NEED?

Most businesses today feel they adequately address their risk. But many are not effectively managing it. AON estimates just 24% of global organizations have an operational risk management process in place to identify, measure, manage report and monitor risks consistently across their organization. With an Enterprise Risk Management solution, you’ll have the tools you need to be confident in your information and the decisions you base on that information.

2010 data is from Aon’s 2010 Global Enterprise Risk Management Survey. The information provided is an extract of Aon’s proprietary Risk Maturity Index and should not be construed as full assessment of risk maturity, but rather as an indicator. The ranking above represents a respondent’s self assessment of maturity – based upon their review of the maturity levels. Based on the findings from Aon’s 2010 Global Enterprise Risk Management Survey Aon has developed, in conjunction with the Wharton School of the University of Pennsylvania, the Aon Risk Maturity Index.
EMBRACE RISK

Integrating Enterprise Risk Management processes into key-decision making such as strategic planning, objective setting, financial decisions, and performance management allows you to make decisions that enable you to hit your targets and increase shareholder value.

With Active Risk Manager, Executives are able to:

- Gain visibility into the big issues or risks that may impact your business plans
- Ensure you have an effective plan for dealing with risks
- Ensure you have the right people accountable for seeing it through
- Confidently assess and communicate risks and compliance to Board members

ACTIVE RISK MANAGER

Active Risk Manager (ARM) is the industry’s most comprehensive Enterprise Risk Management solution and is in use in hundreds of the most respected and demanding organizations, projects and supply chains around the world.

Benefits of using Active Risk Manager (ARM) for Enterprise Risk Management include:

- **Improved decision making with comprehensive data**
  ARM provides a true risk management system of record for the business.

- **Users stay ahead of the risks with real-time data**
  ARM collects all risk data and makes it instantly available through executive dashboards, alerts and reports

- **Simplified risk management with our proven six-step approach**
  Active Risk reduces the complexity of risk management by using a six-step approach that drives value across the organization: Risk Identification, Risk Analysis, Risk Control, Risk Monitoring, Process Improvement, and Reporting.

“Companies in the top 20% of risk maturity generated three times the level of EBITDA as those in the bottom 20%.”
— Ernst & Young, Turning risk into results, March 2012

About Active Risk

Active Risk is the first Enterprise Risk Management (ERM) solution provider to drive business performance by increasing an organization’s risk-bearing capacity.
